As part of the monitoring process, our Investment Adviser has developed risk policies pursuant to which it regularly assesses the risk profile of each of our debt investments and rates each of them based on the following categories, which we refer to as "Internal Risk Ratings". Key drivers of internal risk ratings include financial metrics, financial covenants, liquidity and enterprise value coverage.

Internal Risk Ratings Definitions

Rating Definition

- 1 Borrower is operating above expectations, and the trends and risk factors are generally favorable.
- 2 Borrower is operating generally as expected or at an acceptable level of performance. The level of risk to our initial cost bases is similar to the risk to our initial cost basis at the time of origination. This is the initial risk rating assigned to all new borrowers.
- 3 Borrower is operating below expectations and level of risk to our cost basis has increased since the time of origination. The borrower may be out of compliance with debt covenants. Payments are generally current although there may be higher risk of payment default.
- 4 Borrower is operating materially below expectations and the loan's risk has increased materially since origination. In addition to the borrower being generally out of compliance with debt covenants, loan payments may be past due, but generally not by more than 120 days. It is anticipated that we may not recoup our initial cost basis and may realize a loss of our initial cost basis upon exit.
- 5 Borrower is operating substantially below expectations and the loan's risk has increased substantially since origination. Most or all of the debt covenants are out of compliance and payments are substantially delinquent. It is anticipated that we will not recoup our initial cost basis and may realize a substantial loss of our initial cost basis upon exit.

Our Investment Adviser monitors and, when appropriate, changes the investment ratings assigned to each debt investment in our portfolio. Our Investment Adviser reviews our investment ratings in connection with our quarterly valuation process. The following table summarizes the Internal Risk Ratings of our debt portfolio as of September 30, 2021 and June 30, 2021:

	September 30, 2021		June 30, 2021
