As part of the monitoring process, our Investment Adviser has developed risk policies pursuant to which it regularly assesses the risk profile of each of our debt investments and rates each of them based on the following categories, which we refer to as "Internal Risk Ratings". Key drivers of internal risk ratings include financial metrics, financial covenants, liquidity and enterprise value coverage.

Internal Risk Ratings Definitions

Rating Definition

- 1 Borrower is operating above expectations, and the trends and risk factors are generally favorable.
- 2 Borrower is operating generally as expected or at an acceptable level of performance. The level of risk to our initial cost bases is similar to the risk to our initial cost basis at the time of origination. This is the initial risk rating assigned to all new borrowers.

- 3 Borrower is operating below expectations and level of risk to our cost basis has increased since the time of origination. The borrower may be out of compliance with debt covenants. Payments are generally current although there may be higher risk of payment default.
- 4 Borrower is operating materially below expectations and the loan's risk has increased materially since origination. In addition to the borrower being generally out of compliance with debt covenants, loan payments may be past due, but generally not by more than 120 days. It is anticipated that we may not recoup our initial cost basis and may realize a loss of our initial cost basis upon exit.
- 5 Borrower is operating substantially below expectations and the loan's risk has increased substantially since origination. Most or all of the debt covenants are out of compliance and payments are substantially delinquent. It is anticipated that we will not recoup our initial cost basis and may realize a substantial loss of our initial cost basis upon exit.

Our Investment Adviser monitors and, when appropriate, changes the investment ratings assigned to each debt investment in our portfolio. Our Investment Adviser reviews our investment ratings in connection with our quarterly valuation process. The following table summarizes the Internal Risk Ratings of our debt portfolio as of December 31, 2021 and September 30, 2021:

	December 31, 2021		September 30, 2021

Consolidated Results of Operations

(dollar amounts in thousands, except per share data)

Total investment income for the three month periods ended December 31, 2021 and September 30, 2021 was \$43,972 and \$43,762, respectively. This \$210 net increase was primarily due to an increase in prepayment fees and OID accretion from higher repayment activity. This was partially offset by lower interest income from a lower average investment balance which was primarily due to higher repayment activity during the quarter.

Total expenses for the three month periods ended December 31, 2021 and September 30, 2021 were \$21,523 and \$21,676, respectively. This \$153 net decrease during the three month period ended December 31, 2021 was mainly due to a decrease in interest expense in the three month period ended December 31, 2021.

During the three month period ended December 31, 2021, the Company recorded a net realized and unrealized gain (loss) of \$11,512. This was primarily driven by increases in the fair value of SolAero Technologies Corp. and Derm Growth Partners III, LLC and realized gains on equity co-investments. This was partially offset by a decrease in value of the Company's investment in Credit Fund.

Liquidity and Capital Resources

(dollar amounts in thousands, except per share data)

As of December 31, 2021, the Company had cash, cash equivalents and restricted cash of \$93,074, notes payable and senior unsecured notes (before debt issuance costs) of \$449,200 and \$190,000, respectively, and secured borrowings outstanding of \$407,655.
