Rating Definition

1	Performing – Low Risk: Borrower is operating more than 10% ahead of the Base Case
2	Performing – Stable Risk: Borrower is operating within 10% of the Base Case (above or below). This is the initial rating assigned to all new borrowers
3	Performing – Management Notice: Borrower is operating more than 10% below the Base Case. A financial covenant default may have occurred, but there is a low risk of payment default
4	Watch List: Borrower is operating more than 20% below the Base Case and there is a high risk of covenant default, or it may have already occurred. Payments are current although subject to greater uncertainty, and there is moderate to high risk of payment default
5	Watch List – Possible Loss: Borrower is operating more than 30% below the Base Case. At the current level of operations and financial condition, the borrower does not have the ability to service and ultimately repay or refinance all outstanding debt on current terms. Payment default is very likely or may have occurred. Loss of principal is possible
6	Watch List – Probable Loss: Borrower is operating more than 40% below the Base Case, and at the current level of operations and financial condition, the borrower does not have the ability to service and ultimately repay or refinance all outstanding debt on current terms. Payment default is very likely or may have already occurred. Additionally, the prospects for improvement in the borrower's situation are sufficiently negative that impairment of some or all principal is probable
