Weighted average yields include the effect of accretion of discounts and amortization of premiums and are based on interest rates as of June 30, 2018. As part of the monitoring process, our Investment Adviser has developed risk policies pursuant to which it regularly assesses the risk profile of each of our debt investments and rates each of them based on the following categories, which we refer to as "Internal Risk Ratings":

#### **Internal Risk Ratings Definitions**

 Rating
 Definition

 1
 Performing—Low Risk: Borrower is operating more than 10% ahead of the base case.

2 Performing—Stable Risk: Borrower is operating within 10% of the base case (above or below). This is the initial rating assigned to all new borrowers.

- 3 **Performing—Management Notice:** Borrower is operating more than 10% below the base case. A financial covenant default may have occurred, but there is a low risk of payment default.
- 4 Watch List: Borrower is operating more than 20% below the base case and there is a high risk of covenant default, or it may have already occurred. Payments are current although subject to greater uncertainty, and there is moderate to high risk of payment default.
- 5 Watch List—Possible Loss: Borrower is operating more than 30% below the base case. At the current level of operations and financial condition, the borrower does not have the ability to service and ultimately repay or refinance all outstanding debt on current terms. Payment default is very likely or may have occurred. Loss of principal is possible.
- 6 Watch List—Probable Loss: Borrower is operating more than 40% below the base case, and at the current level of operations and financial condition, the borrower does not have the ability to service and ultimately repay or refinance all outstanding debt on current terms. Payment default is very likely or may have already occurred. Additionally, the prospects for improvement in the borrower's situation are sufficiently negative that impairment of some or all principal is probable.

Our Investment Adviser's risk rating model is based on evaluating portfolio company performance in comparison to the base case when considering certain credit metrics including, but not limited to, adjusted EBITDA and net senior leverage as well as specific events including, but not limited to, default and impairment.

Our Investment Adviser monitors and, when appropriate, changes the investment ratings assigned to each debt investment in our portfolio. In connection with our quarterly valuation process, our Investment Adviser reviews our investment ratings on a regular basis. The following table summarizes the Internal Risk Ratings of our debt portfolio as of June 30, 2018 and March 31, 2018:

	June 30, 2018			March 31, 2018		
	 Fair Value	% of Fair Value		Fair Value	% of Fair Value

Internal Risk Rating 3	226.1	13.17		142.1	8.39

As of June 30, 2018 and March 31, 2018, the weighted average Internal Risk Rating of our debt investment portfolio was 2.3.

#### **Consolidated Results of Operations**

(dollar amounts in thousands, except per share data)

Total investment income for the three month periods ended June 30, 2018 and March 31, 2018 was \$52,452 and \$47,483, respectively. This \$4,969 net increase was primarily due to an increase in interest income and other income from our debt portfolio and an increase in interest income from Credit Fund, partially offset by a decrease in dividend income from Credit Fund, during the three month period ended June 30, 2018.

Total expenses for the three month periods ended June 30, 2018 and March 31, 2018 were \$24,242 and \$22,353, respectively. This \$1,889 net increase during the three month period ended June 30, 2018 was primarily attributable to an increase in interest expense as a result of an increase in secured borrowings and LIBOR, an increase in incentive fees, and an increase in professional fees.

During the three month period ended June 30, 2018, the Company recorded a net realized gain and change in unrealized depreciation of \$(15,104). This was primarily due to net change in unrealized depreciation on our debt investments from changes in various inputs utilized under our valuation methodology, including, but not limited to, market spreads, leverage multiples and borrower ratings, and the impact of exits.

#### Liquidity and Capital Resources
